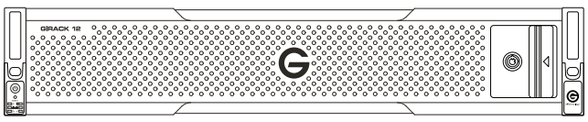
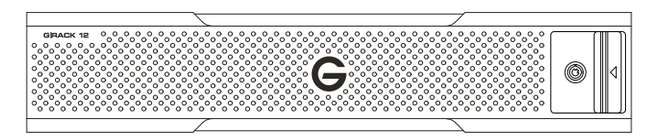
G-Technology®

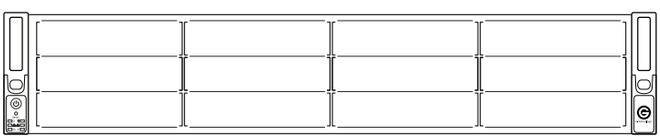
G|RACK™ 12

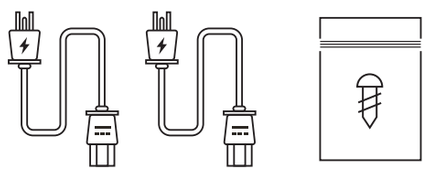


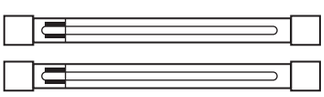
QUICK START GUIDE

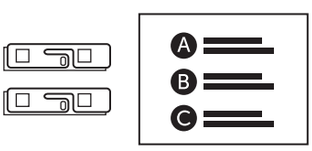
HARDWARE

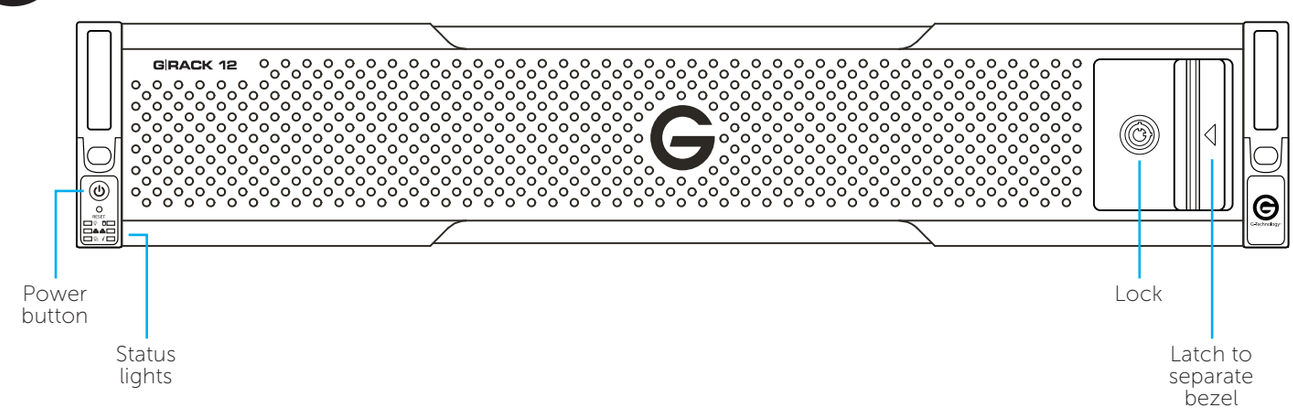


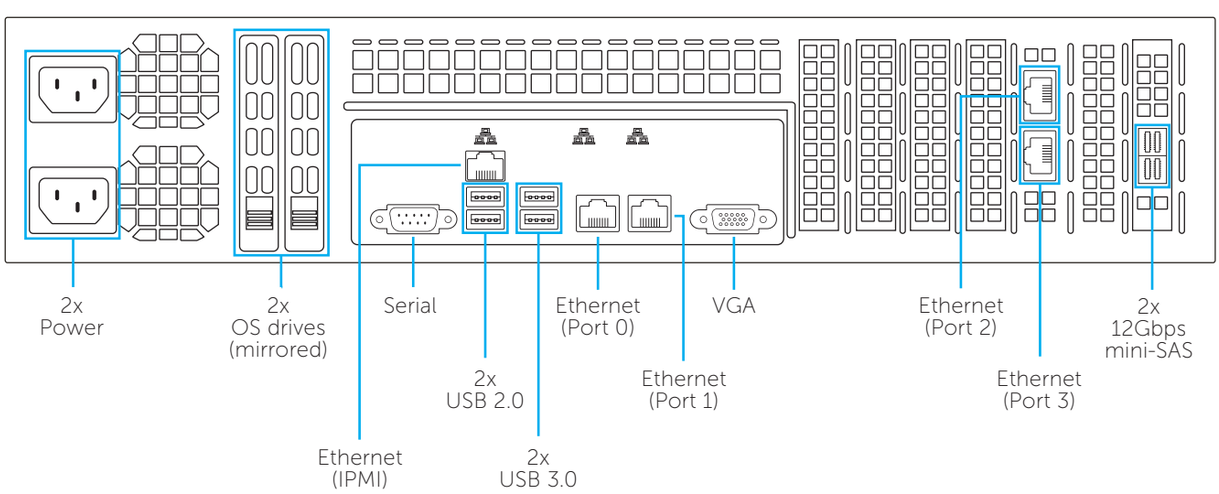










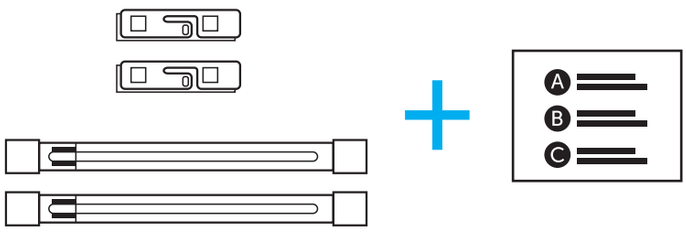


1

Please check that the location for the G-RACK 12 is away from fire, water, heat, and electrical hazards.

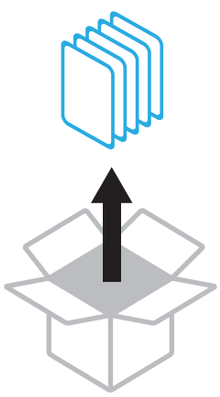
If placing G-RACK 12 into a rack enclosure: first remove the Rail Kit and follow its included directions to attach rails and install the G-RACK 12.

The kit also includes a Rack Rail Adapter Kit to enable square rack hole and round hole installations.



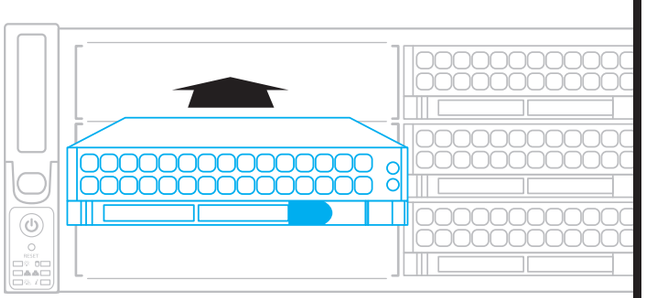
2

Remove hard drives from the HDD box.



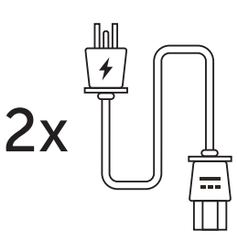
3

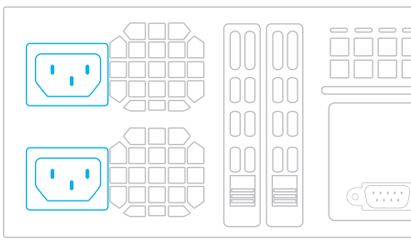
Insert hard drives into the G-RACK 12 with the blue latch on the RIGHT side. Order does not matter. Then attach the G-RACK 12 bezel, left side first.



4

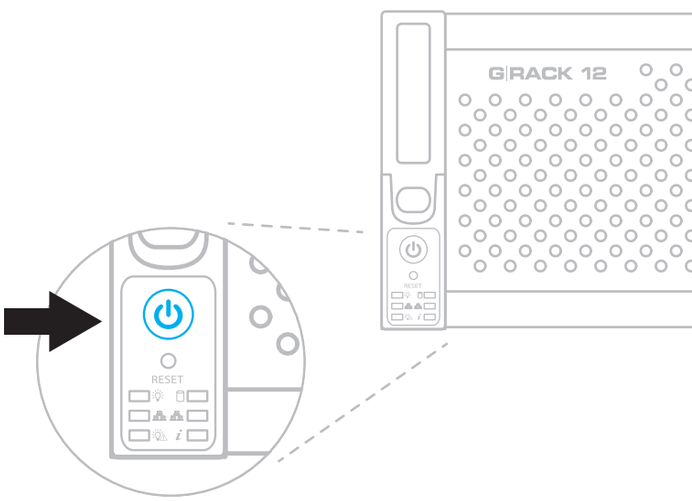
Insert the 2 power cords into G-RACK 12 and then into a surge protector (recommended) or a wall outlet.

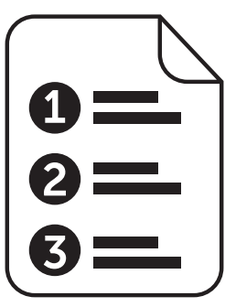




5

Press the power button to turn on the G-RACK 12.



6


To complete the setup and configuration of your G-RACK 12, refer to the Quick Start Guide for Software.
